Species Election

This application encompasses multiple species of the inventive subject matter. These include 24 different species shown respectively in Figures 1-2, 4-18, and 21-27. Pursuant to 35 USC 121, applicants are required for a complete response to (1) elect a single disclosed species and (2) list all claims readable on the elected species including any claims subsequently added (MPEP 809.02(a)).

None of the present claims appear to be fully generic to all species.

Applicants are further advised that a mere argument alleging that a generic claim exists or is allowable will not satisfy a species election requirement. For a complete response, applicants must elect a single species and list the claims readable on that species as set forth above. Because of the large number of species involved, the present application is not considered suitable for election by telephone, and hence, applicants have not been offered the option of a telephone election in this instance.
